DETAILED ACTION

Drawings

In the drawing, numeral "150" be provided with "State Machine" label as referred to in the Specification. It is a minor informality.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 20-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 20, 23 and 26 claim "a *subset* of the sequence...", Examiner is unable to find a clear support in the Specification. There is no disclosure of "a *subset of the sequence of the grouping written into the memory, the subset having fewer groupings of bits than the sequence of grouping of bits written into the memory*".

Furthermore, the limitation “ *selectively applying to a third MUX the subset applied to the first MUX and another data stream applied to the second MUX*”, From figure, it looks like MUX 2, 140 (second MUX) is receiving the subset applied to the first MUX (MUX 1, 120) and the data stream applied to the third MUX (MUX 3, 130) {Specification, page 2, paragraph [0041], lines 9-13}. Clarification is requested.

3. Claims 20-27 will be examined subject to clarification and removal of rejection under 112, as above.
